COWS ALWAYS TELL THE TRUTH...

Cows send out useful information every moment of the day. You just need to know how to read the signals. We train advisors and dairymen in the field of practical dairy farming. We focus on the cows demands on barn feed and care. Dairy farming is about cows after all. Our lectures inform and confront in a pleasant way. Our training is instructive and practical. Our advice is to the point and based on scientific knowledge. Our aim is "Happy cows, happy farmers".

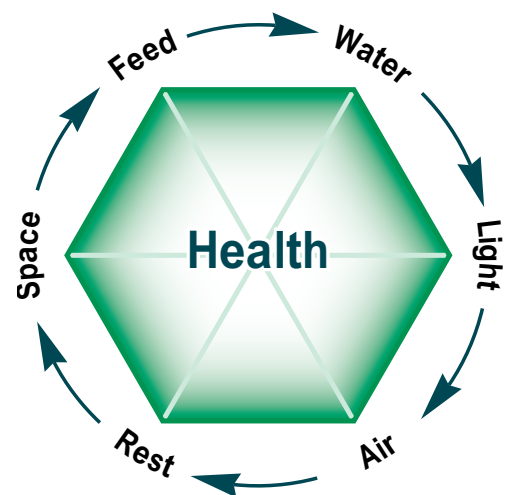

THE COWSIGNALS® CONCEPT

Prevent disease and owneritis.

Our no nonsense, keep it simple approach starts with:

Look Think Act.

After serious observation in the barn (see, hear, feel) we look at success factors, bottlenecks and improvement points. Therefore we use the CowSignals® diamond and our checklists. Does the cow get the 6 freedoms of the pasture, also offered in the barn? In the middle number seven: Health. Do you see curved backs, empty rumens, wounds or infection?

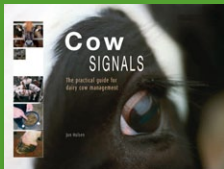

LECTURE AND TRAINING

All our courses are supported by beautifully illustrated books.
